

# Omnicell RDX Essential

Automation that makes sure you have the right medication at the right time and in the right place within your pharmacy.

Omnicell RDX Essential is the smallest robotic dispensing system that Omnicell have in their portfolio. The system ensures the ongoing, seamless storage and safe dispensing of medication. Medication is sorted, stacked, stored and then picked by the robotic dispensing system reducing the risk of picking errors. This means no more grabbing items off a shelf that may have been put back in the wrong place when you are in a hurry or spending hours on operational tasks like managing stock rotation. This system offers many of the functions available on the larger robots but requires less space to improve your pharmacy workflow. The bespoke system offers automation with minimum manual input and can fit into any space or area in your pharmacy.

## Key benefits for your pharmacy and patients:

- **Pharmacy time saved and reinvested into patient care** - pharmacy staff no longer spend their time on operational and repetitive tasks like searching for medication, manual picking or managing stock rotation. The robot does these tasks for you.
- **Improved inventory control and savings** - the robot automation enables you to keep track of expiry dates, manage medication by FIFO and allows you to track slow moving items and eliminate waste. These practices will help your pharmacy save money.
- **Improved patient safety** - medication is sorted, stacked, stocked and picked by the robot. This eliminates the chance of human error and significantly reduces the chance of picking errors.
- **Improve workflow and efficiency** - the automation will allow you to dispense more and produce prescriptions faster, allowing you to increase revenue by investing more time in patient interactions and paid for consultations.
- **The robot can generate reports on stock and usage** - these reports can be produced in real time. No more stock counting is needed and stock can be ordered when required. This allows more time for you to spend with the patients to support and build relationships as well as to upsell other services.
- **The automation makes sure you have the right medication at the right time and in the right place within your pharmacy** - medicines are available immediately for dispensing and you can provide a faster, safer service to your customers. This in return improves customer satisfaction and long-term retention.
- **Purposely designed for smaller pharmacies** - RDX Essentials offers a very small footprint and requires less space in your pharmacy compared to other models. The RDX Essential is available in seven different lengths and three heights so there is a robot available to suit your pharmacy's needs.
- **Supports hub and spoke model to improve efficiency and reduce costs.**

# Omnicell RDX Essential

Automation that makes sure you have the right medication at the right time and in the right place within your pharmacy.

The Omnicell RDX Essential offers many of the functions available on the larger robots but requires less space to improve your pharmacy workflow.

The Omnicell RDX Essential is available in seven different lengths and three different heights. Only the front of the RDX Essential needs to be accessible, the main body of the robot can be placed through a wall into any available space behind the pharmacy area.

The size of the robot is available to suit every location, workflow and your pharmacy's needs.

## Specification

Variable lengths:

4m, 5m, 6m, 7m, 8m, 9m and 10m

Variable heights: 2.5m, 2.75m and 3m

Fixed width: 1.61 m

## System and design implementation - we don't just sell you a system

Our team of experts will work closely with you to design lean processes. They will develop a solution which complements and supports your processes by ensuring you have the right systems in the right locations. They will also ensure that the system is easy to use yet effective so you can achieve the most from it and maximise your return on investment.

Call us today for more information or to arrange a free survey at your pharmacy. Omnicell are also inviting pharmacies to visit the Customer Experience Centre at Omnicell's headquarters in Manchester to meet their team of experts and learn how Omnicell's automated solutions can help to improve patient safety and efficiencies.
